IN THE CLAIMS:

1 - 22. (Cancelled)

23. (New) A method for treating an individual having an autistic disorder using digestive enzymes, the method comprising administering to the individual an effective amount of digestive enzymes to promote changes in autistic behavior by ameliorating a symptom of the autistic disorder.

24. (New) The method of claim 23, wherein the symptom comprises an impairment in making eye contact with another individual.

25. (New) The method of claim 23, wherein the symptom comprises a lack of social interaction.

26. (New) The method of claim 23, wherein the symptom comprises a delay in or lack of spoken language.

27. (New) The method of claim 23, wherein the symptom comprises a repetitive pattern of behavior such as arm flapping.

28. (New) The method of claim 23,wherein the symptom comprises hyperactivity.

29. (New) The method of claim 23, wherein the symptom comprises a lack of a formed bowel movement.

30. (New) The method of claim 23, wherein the symptom comprises a lack of toilet training.

31. (New) The method of claim 23, wherein the administering of digestive enzymes comprises administering a tablet of digestive enzymes comprising approximately 4,000 to approximately 60,000 U.S.P. Units/tablet on a daily basis.

32. (New) The method of claim 23, wherein the digestive enzymes comprise lipase, amylase, protease, cellulose, sucrase, or maltase either singularly or in any combination thereof.

33. (New) The method of claim 23, wherein the administering of digestive enzymes comprises administering an amount of digestive enzymes on a daily basis, wherein said amount is determined according to the age of the individual.

34. (New) The method of claim 33, wherein the digestive enzymes are administered at least about three times per day.

35. (New) The method of claim 23, wherein the digestive enzymes comprise a pancreatic enzyme.

36. (New) A method for treating an individual having a disorder using digestive enzymes, the disorder comprising ADD (attention deficit disorder) or ADHD (attention deficit hyperactivity disorder), the method comprising administering to the individual an effective amount of digestive enzymes to ameliorate a symptom of the disorder.

37. (New) The method of claim 36, wherein the symptom comprises hyperactivity.

38. (New) The method of claim 36, wherein the symptom comprises a lack of attention.

39. (New) The method of claim 36, wherein the administering of digestive enzymes comprises administering at least one tablet of digestive enzymes comprising approximately 4,000 to approximately 12,000 U.S.P. Units/tablet on a daily basis.

40. (New) The method of claim 36, wherein the digestive enzymes comprise lipase, amylase, protease, cellulose, sucrase, or maltase either singularly or in any combination thereof.

41. (New) The method of claim 36, wherein the digestive enzymes comprise a pancreatic enzyme.

42. (New) A method for treating an individual having a disorder using digestive enzymes, the disorder comprising Autism, ADD (attention deficit disorder) or ADHD (attention deficit hyperactivity disorder), the method comprising administering digestive enzymes to the individual to promote protein digestion to improve a symptom of the disorder.
